ROAD PAVING AND IMPROVEMENT PLAN
ENGINEER'S REPORT

Unit of Development R-3
INDIAN TRAIL IMPROVEMENT DISTRICT

INTRODUCTION

The Indian Trail Improvement District (ITID or District) is a special taxing district of the State of Florida originally created by Chapter 57-646, Laws of Florida. Chapter 2002-330 Laws of Florida, subsequently codified the special laws relating to ITID. The title to Chapter 2002-330 provides:

> "An act relating to Indian Trail Improvement District, Palm Beach County; providing for codification of special laws relating to the Indian Trail Improvement District, a special tax district of the state; providing legislative intent; codifying, reenacting, and amending chapters 57-646, 67-692, 80-89, 82-352, 83-491, 88-501, 89-465, 90-446, 92-261, 97-326, 99-473, Laws of Florida; providing for minimum charter requirements; amending the boundaries of the district to include additional lands; providing for supervisor qualifications, terms of office, election procedures, and compensation; providing for a referendum; providing for provisions of other laws made applicable; providing for ratification of prior actions; repealing chapters 57-646, 67-692, 80-569, 82-352, 83-491, 88-501, 89-465, 90-446, 92-261, 97-326, 99-473, Laws of Florida, relating to the Indian Trail Improvement District; providing for liberal construction; providing for severability; providing an effective date."

ITID operates according to the provisions of Chapter 2002-330, as amended and supplemented, and the applicable provisions of Chapter 298, Florida Statutes. The District is empowered to construct and maintain public facilities including water and sanitary sewer, drainage, roadways, and parks and recreation.

Section "298.301 (4) and (5), F.S. set forth the requirements to be included in the Engineer's Report. These requirements are:

> "(4) The engineer may at any time call upon the attorney of the district for legal advice and information relative to her or his duties. The engineer shall proceed to view the premises and identify all lands, within or without the district, to be acquired by purchase or condemnation and used for rights-of-way, or other works set out in the proposed plan or plan amendment. The engineer shall, with the advice of the district attorney, staff, and consultants, determine the amount of benefits and the amount of damages, if any, that will accrue to each subdivision of land (according to ownership), from carrying out and putting into effect the proposed plan or plan amendment. The engineer shall determine only those benefits that

are derived from the construction of the works and improvements set out in the proposed plan or plan amendment. The engineer has no power to change the proposed plan or plan amendment without board approval."

"(5) The engineer shall prepare a report arranged in tabular form, the columns of which are to be headed as follows: column one, "owner of property"; column two, "description of property"; column three, "number of acres"; column four, "amount of determined benefit"; column five, "amount of determined damages"; column six, "number of acres to be taken for rights-of-way, district works, etc." The engineer shall also, by and with the advice of other employees and consultants of the district, estimate the cost of the works set out in the proposed plan or plan amendment, including the cost of and the probable expense of organization and administration. A maintenance assessment recommendation must also be included in each engineer's report. However, the maintenance assessment may not be considered as part of the costs of installation or construction specified by the proposed plan or plan amendment in determining whether benefits exceed damages. The report shall be signed by the engineer and filed in the office of the secretary of the district. The secretary of the district or deputy thereto, shall assist as needed in preparation of the report."

The District is governed by a five member Board of Supervisors. The Board of Supervisors employs an Executive Director who has charge of the day to day operations of the District. The Board of Supervisors also employs a District Attorney who is legal advisor to the Board and handles all legal matters for the District. In addition, the Board of Supervisors employs a District Engineer who has control over the engineering works in the District. The District has four officers; a President; a Vice-President; a Secretary; and a Treasurer.

The geographic legislative boundaries of the District are illustrated in Exhibit "A". Areas within the legislative boundaries that have gone through the legal process of becoming units of development are cited as being "active units". The District had two Road Paving Plans and amendments thereto in the M-1 Basin. The R1 Plan goal was to generally have a paved road within 1 mile of all residential lots. The R2 Plan goal was to generally have a paved road within 1/2 mile of all residential lots. The R1 Plan was initiated in 1980 with amendments. The R2 Plan was initiated in 1996 with amendments. ITID also had two road paving Water Control Plans and amendments thereto in the M-2 Basin, the M-2A and M-2B.

AUTHORIZATION

Direction to form a Road Paving and Improvement Plan for Unit of Development R-3 (the "Plan") was given on February 7, 2018 by the District's Board of Supervisors. Three presentations were given to the Board at successive Board meetings on February 21, March 29, and April 25, 2018. The Board designated Unit of Development R-3 on June 20, 2018 pursuant to Resolution 2018-005. The Board approved and created Unit of

Development R-3 on August 22, 2018 pursuant to Resolution 2018-007. The Board adopted the Plan for Unit of Development R-3 on September 19, 2018 pursuant to Resolution 2018-008. A Public Hearing was held at the January 31, 2019 Board Meeting. As a result of the Public Hearing the Board directed revisions to the Plan. Four presentations to the Board at their Regular Meetings followed on March 27, April 17, May 15, and June 19, 2019. Following the presentation on June 19, 2019 the Board adopted an amended Plan pursuant to Resolution 2019-008. A second public hearing was held on October 23, 2019. The Board directed the District Engineer to proceed with the Unit of Development R-3 Engineer's Report at the Regular Meeting which followed the Public Hearing for Unit of Development R-3 on October 23, 2019 pursuant to Resolution 2019-016. The adopted Plan included one revision which changed 89th from millings to paving.

PURPOSE AND SCOPE

This Engineer's Report addresses Unit of Development R-3, a roadway plan for District wide access to schools, parks, ITID facilities, emergency facilities, high use base rock roads, and road improvements needed for safety. This Road Paving and Improvement Plan includes Units 1, 2, 3, 4, 5, 6, 7, 9, 10, 12, 13, 14, 19A (Parcel 2), 19 Parcel 1, 19 Parcel 3, and Contractual Units Las Flores and Dellwood. The Plan excludes Unit M-1S (Bay Hill), Rustic Lakes, Units 11, 17, 18, and the other area of Unit 19 (Pierce Hammock Elementary School), see attached Exhibit "B". The roads included in the capital improvements of this plan are illustrated in the attached map Exhibit "C" and are cited in the attached table Exhibit "D" as amended at the October 23, 2019 Board of Supervisors Regular Meeting. Additional details can be found in the Road Paving and Improvement Plan as adopted on May 13, 2020.

The general scope of this Road Paving and Improvement Plan is to improve roads for access to schools, District facilities, parks, or fire rescue services. These roadways are currently overburdened and/or need connection and/or need improvements and/or need safety improvements. The existing roads are either base rock or millings or poorly surfaced asphalt that fail to meet current roadway traffic demands. The proposed roadways will be 22' wide and be paved or millings pursuant to District specifications and designs. Drainage of the roads will be as currently exist via swales when road surfaces are improved. Intersection improvements are proposed where needed and may require some drainage revisions due to pavement widening. Should 60th Lane North be paved instead of 60th Street North east of 180th Avenue North, a canal crossing will be necessary. Traffic calming is included in the cited capital improvements when deemed warranted. Utility relocations are not anticipated for any of the driving surface improvements. The construction plans may identify some necessary relocation of utilities at intersection improvements.

Neither the Plan nor the Engineer's Report shall be construed as exact representation of construction plans and specifications. Engineering plans and specifications will be prepared upon authorization by the Indian Trail Improvement District Board after final approval of the Engineer's Report and Plan by the Board of Supervisors.

All roadways are within the Districts easements in unincorporated Palm Beach County. Permits are needed from Palm Beach County when the improved roads intersect with Palm Beach County Roads such as Seminole Pratt Whitney Road. Permits are also necessary from Palm Beach County for all traffic control. South Florida Water Management District permits should not be needed for changing road surfaces as all road surfaces are considered impervious, however, intersection improvements and/or turn lanes may need permits from the South Florida Water Management District.

AMOUNT OF DAMAGES

The District Engineer viewed the premises and identified there are no lands, within or without the district, to be acquired by purchase or condemnation and used for rights-of-way, or other works set out in the proposed plan. All improvements are proposed to fall within existing easement areas. As such, there will be no taking of lands and therefore no "damages" as cited in 298.301 (4) and (5).

COSTS OF THE "WORKS SET OUT IN THE PROPOSED PLAN"

The Engineer's opinions of construction costs for each road segment are included as Exhibits "E" (three pages), see attached. The total costs are estimated to be $9,008,825 with a contingency of $2,253,000 for a total of $11,261,825. Note that either 60th Lane North or 60th Street North from 180th to Mandarin is to be constructed, but not both. As such the higher of the two costs is included in the total (60th Lane North) benefit/cost assessment to insure the requirements are met.

The "costs of and the probable expense of organization and administration" are estimated as 25 percent of the construction costs, and are included in the above engineer's opinions of costs. All costs are calculated at current value without inflation.

BENEFITS

Annual benefits are cited as well as long term benefits based on a 50 year life cycle analysis. Although roadways when properly maintained will continue to function at their desired level of service for longer than 50 years, a planning horizon of 50 years is thought to be a reasonable time period to evaluate benefits/costs. As consistent with the cost analyses, benefits for 60th Lane North or 60th Street North from 180th to Mandarin are listed only once as the benefits will be for the constructed roadway connection. There are 16 improvement projects in Unit R-3, with the aforementioned alternate being 17 listings, but only 16 projects.

A. Roadway maintenance. Once constructed and after removing the initial costs of construction the annual maintenance costs are estimated to be: $10,290 for base rock, $6,968 for millings, and $5,676 for paving (per mile). Therefore, millings and paved roads are estimated to cost less to maintain than base rock roads. It is noted that millings roads and their maintenance costs are relatively new and the

costs are estimates based on data to date. These maintenance costs could go up or down based on experience as to what works best. The estimated annual benefit from reduced maintenance for these 16 projects is $19,100/year and $955,011 for 50 years.

B. Reduced travel time for all land in the District. The roadways in this Plan are utilized for access to schools, parks, District facilities, and fire rescue services. Travel time is reduced as base rock roads (and the existing millings roads being upgraded) are subject to frequent pot holes, “wash boarding”, and maintenance requirements. Drivers typically slow down with these conditions or drive at higher risk when travelling at the same or greater speed. Posted speed limits may also be higher on paved roads. Travel time will be substantially reduced when the traffic loop is created from Frontier Elementary and Osceola Middle schools on 180th to allow traffic to again travel south from Tangerine and have access to Mandarin Blvd. Long delays are occurring when the children are being dropped off and picked up due to the single access route. The dollar value is based on a 5 mph difference in speed that includes stopping at stop signs for the length of the proposed improvement with one wage earner per vehicle and at a rate of $25/hour. The trip generation is based only on School trips (PBC published rates), Parks (PBC published rates), Fire Rescue (estimated at 12/yr), and District trips (estimated at 309/yr). The estimated annual benefit from reduced travel time for these 16 projects is $125,679/year and $6,283,932 for 50 years.

C. District wide reduction in maintenance costs using vehicular trips generated by schools, parks, fire rescue, and the District. Pot holes increase vehicular maintenance due to the jarring of the suspension and steering systems. Some fuel savings may also occur due to reduced travel time and access routes. The benefits are based on an increased maintenance costs of 5.2 cents/mile for the length of the road times the trips/day. The estimated annual benefit from reduced District wide vehicle maintenance for these 16 projects is $54,896/year and $2,744,821 for 50 years.

D. Safety. It is anticipated that the improvements and calming in this plan will enhance both driver and resident safety. Stopping distance on base rock roads is longer than on paved roads due to potential skidding. The purpose of calming is safety. Calming and better roads should reduce the frequency and severity of accidents. A specific additional monetary benefit is assigned below for Fire Rescue betterment. Monetary safety benefits are calculated based on utilizing a 10% savings on average vehicle insurance cost at $2,000/year, the road length, trips (School, Parks, District, & Fire Rescue), and an average driver annual mileage of 10,000 miles. The estimated annual benefit for safety improvements for these 16 projects without life savings (see Fire Rescue) is $21,114/year and $1,055,701 for 50 years.

E. Increased District wide property value. All improvements included herein will result in increased services being provided to property owners. An estimate of the increased value to properties is made by using an increase in value of

$200/lot District wide. The estimated benefit from increased property values for these 16 projects is $59,292 annually and $2,964,600 for fifty years.

F. Unit R-3 benefits for access to parks, schools, Fire Rescue, and District facilities. These benefits are estimated based on the number of lots served. There are approximately 14,823 lots in Unit R-3. An annual benefit of $1/lot is assigned for parks and District access. School benefits are estimated from the reduction in waiting times and trips. A 2 minute waiting time reduction is used herein for school trips at the affected schools for 210 days/yr with $25/hr value for the driver. A school benefit of $1/lot for reduced aggravation is also included. Assigning a dollar value to a life is disconcerting, insensitive, and extremely subjective but some assumptions must be made in order to complete a benefit/cost analysis. Fire Rescue benefits are estimated by using 1 life saved every 5 years (or the equivalent thereof in reduced severity of injury due to reduced response time) and a value of $5,000,000 for a life. These benefits are then proportioned by the road length of the project divided by the road lengths of all of the 16 projects. The estimated benefit from parks, schools, District, and Fire Rescue access for these 16 projects is $1,981,289/year and $99,064,450 for 50 years.

G. Other benefits not assigned a monetary benefit:

    a. Driver/resident frustration. The District has heard frequent complaints about the deficiencies of the roads in this plan as well as some others that don't meet the current criteria for the roads included in this capital improvement plan.
    b. Air quality. Dust will be reduced. Also with less travel time there is less gasoline used which reduces exhaust emissions. Some compelling arguments for reducing dust with respect to lung issues have been heard at District public meetings.
    c. Noise. There will be reduced noise from the vehicular bumping that occurs on a base rock road as opposed to a paved road except at a planned speed hump (table) and rumble strips.
    d. Water quality. There will be less particulate matter in runoff from a paved road than from a base rock road.
    e. Drainage. A typical base rock road when regraded results in some of the base rock going into the swale. Over time this base rock builds up and can impede drainage and/or result in needing the swales to be reconstructed. Although sediments do wash off of a paved road, the rate of accumulation in the swale is much less than that from a base rock road.

The total benefits are $1,981,289/year and $113,781,367 for 50 years.

BENEFIT/COST

Total cost of the Unit R-3 improvements including the 25% contingency is $11,261,825 and the benefits for the 50 year analysis period is $113,068,514. The Benefit/Cost ratio

is therefore 10.0 overall. The range of the B/C ratio for the 16 project is from a minimum of 4.8 for 73rd from Seminole Pratt Whitney Road to the Kidscape Park entrance, to a maximum of 13.6 for 180th from Hamlin Blvd to Tangerine. Exhibit "F" lists the 16 roadway segments and the individual Benefit/Cost ratios as well as the overall B/C ratio.

F.S. 298.301 (5), TABLE REPORT / SCHEDULE OF LANDOWNERS

See Exhibit "G" as required in F.S. 298.301 (5).

METHODS OF FINANCING

Several alternative methods of funding the proposed Water Control Plan improvements are available to ITID in accordance with District policy and applicable state statutes. These are as follows:

Construction over several budget years, determining the costs annually based on each year's proposed construction program by collecting the funds through assessments.

1. Construction utilizing funds borrowed from conventional financial institutions, repaying loans from assessments over several years budgets.

2. Construction of required improvements utilizing the sale of ITID bonds, with the bonds being repaid from annual assessments to the benefited lands within the Unit until the indebtedness is retired.

3. Governmental Interlocal funding agreements.

MAINTENANCE ASSESSMENT RECOMMENDATION

The benefits cited above include reduced annual maintenance costs utilizing: $10,290 for base rock, $6,968 for millings, and $5,676 for paving (per mile). The millings maintenance costs are based on the Engineer's analyses of needing no repairs/maintenance of the surface course for two years after construction, minimal repair during the third year after construction and some maintenance every year for the next six years. The millings roads include surface milling, millings added as needed, spraying with a binding liquid, and then compacted with a steel roller every ten years. Paved road maintenance costs are based on needing no repairs/maintenance of the paved surface for ten years after paving, minimal repairs of specific problem areas for the next ten years, and milling and overlaying the roadway after twenty years. Of course, any specific problem areas will be addressed on an as needed basis. The Engineer recommends the above maintenance for the proposed Capital Improvement Projects.

RECOMMENDATIONS

1. The Road Paving and Improvement Plan for Unit of Development R-3 that includes 16 capital projects cited herein be approved by the Board of Supervisors.

2. The Engineers Report for the Road Paving and Improvement Plan for Unit of Development R-3 that includes 16 capital projects cited herein be approved by the Board of Supervisors.

3. The District by due process, acquire and provide the required funds, as specified, for the capital improvements cited herein.

4. The District Board of Supervisors direct construction plans be prepared and bids let for the capital improvements cited herein.

Paved Roads are typically 1-1/2 to 1-3/4 inches of asphalt on 6 to 8 inches of compacted shell or lime rock with a 12 inch compacted subgrade. Paved roadways are for higher traffic areas and can include traffic calming.

Millings Roads are approximately 6 inches of compacted asphalt millings on a compacted base. Milings roads are utilized for low traffic areas.

*Access Group refers to ingress and egress to the 60 lots in the southwest corner of Unit 4.

**Circulation Group refers to traffic circulation to and from Frontier Elementary and Osceloa Creek Middle Schools.
